PROGRAMMING AND SOFTWARE DEVELOPMENT AND ENGINEERING

Web App Development – API Integration – Web Security – Agile & Scrum Methodologies
UI/UX Optimization – Application Development – Project Management – Vulnerability Mitigation

Value Offered: Dynamic software engineer specializing in full-stack development and business application solutions, with hands-on experience building scalable platforms and API integrations for enterprise and governmental clients. Optimized front-end and back-end systems, mitigating vulnerabilities and streamlining software development through Agile and Scrum frameworks. A strong leader, managing cross-functional teams to deliver impactful solutions while ensuring the delivery of user-focused designs.

- Fullstack Development: Developed and deployed complex applications using Angular and Node.js, leading both front-end and back-end development for solutions for large-scale platforms.
- Project Management: Led teams of 2-3 developers, overseeing milestones and deliverables in fast-paced environments. Created Business Requirement Documents (BRDs) to streamline communication between development teams and clients, enhancing project clarity and execution.
- Cybersecurity and Vulnerability Mitigation: Identified and reported over ten vulnerabilities while working as a web security intern, ensuring the stability and security of organizational web apps.

PROFESSIONAL EXPERIENCE

CODE DOG SOLUTIONS

Angular Fullstack Developer & Project Manager

02/2023 – present

Led two large-scale projects: a database development initiative and an application designed to connect government information for citizens, impacting dozens of government agencies and over 10,000 users. Supervised a team of 2 to 3 employees, adjusting staffing based on project milestones.

- Submitted and published 150+ pull requests, including backend updates, frontend optimizations, novel features, and vulnerability mitigations.
- Developed business requirements and collaborated on defining access levels and permissions, doubling accessibility and functionality.
- Worked on front-end and back-end development using Angular and Node.js, contributing to software products through an Agile development process.
- Planned and developed Business Requirement Documents (BRDs), communicating project objectives clearly to development teams.
- Partnered closely with clients to deliver web app pages tailored to specific UI/UX needs and typescript functionality, ensuring high-quality user experiences.
- Participated in daily SCRUM meetings with 12 developers, sharing continuous best practices to optimize systems.

HOMESITE INSURANCE

Java API Software Developer Intern

05/2021 – 08/2021

Collaborated with a team of developers responsible for RESTful API updates required by the company and its clients, focusing on insurance policy pricing calculations. Utilized the Scrum methodology for project management and task completion. Worked within an Agile environment, participating in Scrum meetings to align development efforts and ensure timely delivery of updates.

- Developed, maintained, and updated multiple Java APIs based on Spring Boot, directly contributing to calculating insurance premium prices.
- Supported API updates to improve the accuracy and efficiency of insurance policy pricing.

PROFESSIONAL EXPERIENCE

RAINCOAT, CATASTROPHE INSURANCE

Web Security Developer Intern

06/2020 – 08/2020

Collaborated with senior developers to address security issues across various web applications, utilizing vulnerability scanners to identify potential threats. Applied knowledge from cybersecurity courses to analyze the organization's web pages and improve its web security infrastructure.

- Identified and reported over ten vulnerabilities, with 100% of the issues being addressed by the IT team.
- Enhanced the platform's security by applying cybersecurity principles from various courses, strengthening the organization's defenses.
- Improved web security infrastructure while working closely with the team on multiple web app projects.

THE CATHOLIC UNIVERSITY OF AMERICA

Lab Technician at Technology Services

02/2019 – 05/2019

Provided technical support to over 500 users, addressing hardware and software issues across the university's web services. Managed and resolved over 30 support tickets daily, ensuring timely solutions for faculty, staff, and students.

- Delivered effective IT solutions for various technological needs, enhancing user satisfaction through efficient problem-solving. Ensured customer satisfaction by maintaining follow-up communication with users to address ongoing tech service needs.
- Supported the university's technology services by troubleshooting and resolving hardware and software issues across multiple platforms.

EDUCATION

The Catholic University of America, Washington, D.C.

BS in Computer Science, Minor in Mathematics and Business Management

01/2023

- ✓ Relevant Coursework: Web Design & Programming, Database Management, Software Engineering, Analysis of Algorithms, Discrete Math, Mathematical Finance, Data Analysis
- ✓ Angular Essential Training, LinkedIn Academy (10/2024)

ADDITIONAL INFORMATION

Leadership Engagements:

- Senior Design Project: Facial Recognition System for Masked Users August 2021-May 2022
 - Developed, along with a 3-member team, a Python system that recognizes the image of a face captured even when they are using a medical mask, a common fault in today's popular facial recognition systems.
 - Developed with a heavy emphasis on obtaining a high detection accuracy using ML.
 - The project was submitted for a national competition.
- Culver Academies, Culver, IN: Naval School – Upper School Graduate June-July 2017
 - Throughout three summers, I applied military organizational structure to develop strong character, leadership skills, and reasoning thinking.
 - Gained general knowledge of military operations and logistics.

Technology: Javascript, Python, C++, HTML/CSS/PHP, SQL, Java, Git, Node.js, React, Angular, MS Office Suite (Word, Excel, PowerPoint, Outlook, and Teams), Azure, SharePoint, Zoom, and Google Meets

Languages: Fully bilingual – Excellent oral and written skills in both English and Spanish

Extracurricular Activities: Brazilian Jiu Jitsu (Purple belt), Rugby, and Model United Nations Club
